
End-to-End Example: Update a Passenger Name
Shared Phase
Read user + order
Check policy
Ask confirmation
Write intent
Mei Lee → Mei Garcia
Compiled Contract
Authorization
user confirmed
Hard predicates
owned · active · same count
Dependencies
owner · status · passengers
Bound write
branch · snapshot · exact args
validate
validate
Concurrent Change
Phone number changes
not a task dependency
REBASE + COMMIT
Order becomes cancelled
hard predicate violated
REJECT + REPLAN
The commit decision depends on task predicates—not on whether any physical version changed.
